The Story On IPP

Industrial Propane and Petroleum is a supplier of propane and light and heavy fuel oil handling equipment to the industrial sector. IPP is headquartered near Charlotte, North Carolina, and serves companies primarily in the Southeast. IPP also provides consulting and information services to end-users and other propane and fuel oil dealers from coast to coast.

IPP founder and chief operating officer, Max Gouge, is a third generation propane guy. Prior to forming IPP in 1990, Max was part owner and worked in his family's retail propane, business. He was also involved in his family's plumbing and HVAC businesses. In the early 1980's Max moved he and his family to the Charlotte, NC area. He went to work for PHG Propane Company a division of Piedmont Natural Gas Company, rising to Manager of Operations and Industrial Sales.

With his extensive knowledge of the retail, commercial and industrial energy sectors, Max Gouge is uniquely qualified to meet your specialized fuel-related needs.

A New Dimension in Service: Information

We at IPP have gone a step beyond the traditional "come when you're called" service orientation. By positioning our company as a kind of "partner" in your business, serving as a complete resource for fuel-related information and services, we can enable you to take wise and cost-effective actions.

IPP has access to up-to-the minute information that can affect how you do business. Referencing this information to our extensive knowledge of the industry, we become a true "value added" service, one that can save you time, trouble and money over the long haul. We want to earn your busi-

Exploring Alternative Fuels

If you are concerned about environmental regulations that may affect your business now or in the future, you may want to consider propane. An environmentally safe, clean and economical fuel. propane is often a preferred alternative to light and heavy fuel oils or gasoline when used as a motor fuel. Choosing or converting to propane may be a long-term economical choice when equipment and other costs are compared.

Beyond Fuel

IPP can consult with you on most fuel-related areas of your business. These areas include but are not limited to diesel, gasoline and propane used as motor fuel. Natural gas used as a primary fuel. Propane, light and heavy fuel oils, used as primary or back up fuels to your natural gas.

In addition to offering timely and efficient fuel delivery, we can provide consultation on the equipment needed to store and utilize it. IPP specializes in the purchase and resale of new and used 12,000 thru 120,000 gallon and larger propane bulk storage tanks, direct and indirect fired vaporizers and propane air mixing systems. In addition, we can facilitate any engineering required to

Direct Access To Answers And Authority

When you call IPP, you talk to someone who has the information and authority to make a decision. No run-around. No "I'll have to ask." And you talk to someone who'd rather work to keep a customer than work to get a new one. See for yourself. Call.
